sense and simplicity

## Highlights

### New 1250 Watt HD motor

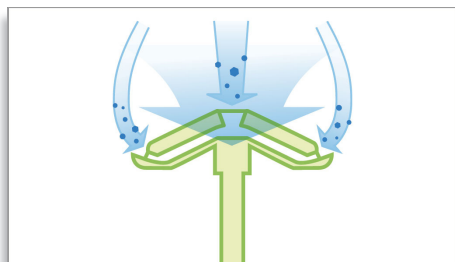

Highly efficient 1250 Watt HD (High Density) motor generates 350 Watt max. suction power, which means that you use 30% less energy without giving in on the cleaning result.

### HEPA AirSeal, HEPA 13 filter

This vacuum cleaner has been designed in such a way that all the air taken in is passed through the washable HEPA 13 filter (99.95% filtration) before it is exhausted. No escape is possible.

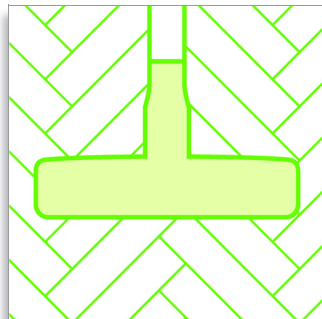

### Tri-active nozzle

This unique nozzle is aerodynamically designed for maximum cleaning efficiency, has side brushes to

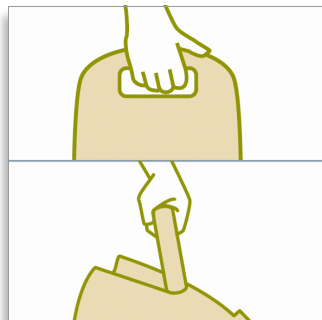

remove dust from corners and curves, and has a front opening to pick up the big bits. Each stroke will deliver an immediate clean result.

### Parquet nozzle

No more risk of scratches thanks to this nozzle with soft brush hairs, especially designed to carefully clean your hard-floors.

### Comfortable carrying handles

This vacuum cleaner has not one, but two carrying handles. When it is on its wheels, there is a handle on top which enables you to easily move the cleaner around with very little bending. The second handle on the front side of the appliance enables you to comfortably carry it around in an upright position.
